Any company so addressed shall promptly and truthfully reply in writing to such inquiries. The reply shall be verified by an officer of the company, if the commissioner so requires.

**739.020 Valuation of securities.** In a life insurance company's annual statement, and for the purpose of determining its solvency, bonds or other evidences of debt may, if amply secured and if not in default as to principal or interest, be valued as follows:

(1) If purchased at par, at the par value; if purchased above or below par, on the basis of the purchase price adjusted so as to bring the value to par at maturity and so as to yield meantime the effective rate of interest at which the purchase was made. The purchase price in no case may be taken at a higher figure than the actual market value at the time of purchase. The commissioner has full discretion in determining the method of calculating values according to this rule, and the values found by him in accordance with such method are final and binding; or

(2) At their market value or their book value, but in no event at an aggregate value

exceeding the aggregate of the values calculated according to subsection (1) of this section.

**739.025 Valuation of policies.** (1) The commissioner shall annually value, or cause to be valued, the reserve liabilities, hereinafter called reserves, for all outstanding life insurance policies and annuity and pure endowment contracts of every life insurance company doing business in this state. He may certify the amount of any such reserves, specifying the mortality table or tables, rate or rates of interest and methods, net level premium method or other, used in the calculation of such reserves.

(2) All valuations made by the commissioner or by his authority, shall be made upon the net premium basis.

(3) In calculating such reserves, he may use group methods and approximate averages for fractions of a year or otherwise.

(4) In lieu of the valuation of reserves required by this section, the commissioner may accept the valuation made by the company, upon such evidence of its correctness as he may require. In the case of any foreign or alien company he may accept any valuation made, or caused to be made, by the insurance supervisory official of any state or other jurisdiction when such valuation complies with the minimum standard provided in ORS 739.030 or 739.035 and if that official accepts as sufficient and valid for all legal purposes the certificate of valuation of the Oregon commissioner when such certificate states the valuation to have been made in a specified manner according to which the aggregate reserves would be at least as large as if they had been computed in the manner prescribed by the law of that official's state or jurisdiction.

(5) The commissioner may vary the standards of interest and mortality in the case of alien companies as to contracts issued by such companies in other countries than the United States, and in particular cases of invalid lives and other extra hazards.

(6) Any company which at any time has adopted a standard of valuation producing greater aggregate reserves than those calculated according to the minimum standard provided in ORS 739.030 or 739.035 may, with the approval of the commissioner, adopt any standard of valuation not lower than the minimum standard.

**739.030 Legal minimum standards for policies issued prior to operative date of Standard Nonforfeiture Law.** (1) This section applies only to policies and contracts issued prior to the operative date defined in ORS 739.340.

(2) The legal minimum standard for the valuation of life insurance contracts issued before January 1, 1918, is the method and basis of valuation applied by the insurance department of this state in the valuation of such contracts before January 1, 1918.

(3) The legal minimum standard for the valuation of life insurance contracts issued on and after January 1, 1918, is the one year preliminary term method of valuation, on the basis of the American Experience Table of Mortality with interest at three and one-half percent per annum.

(4) The legal minimum standard for the valuation of annuities issued on and after January 1, 1918, is McClintock's "Table of Mortality Among Annuitants" with interest at four percent per annum. However, annuities deferred 10 or more years and written in connection with life insurance shall be valued on the same basis as that used in computing the consideration or premium therefor, or upon any higher standard at the option of the company.

**739.035 Legal minimum standards for policies issued on or after operative date of Standard Nonforfeiture Law.** (1) This section applies only to policies and contracts issued on or after the operative date defined in ORS 739.340.

(2) The minimum standard for the valuation of all such policies and contracts is the Commissioner's Reserve Valuation Method defined in subsection (3) of this section, three and one-half percent interest, and the following tables:

(a) For all ordinary policies of life insurance issued on the standard basis, excluding any disability and accidental death benefits in such policies, the Commissioner's 1941 Standard Ordinary Mortality Table.

(b) For all industrial life insurance policies issued on the standard basis, excluding any disability and accidental death benefits in such policies, the 1941 Standard Industrial Mortality Table.

(c) For annuity and pure endowment contracts, excluding any disability and accidental death benefits in such contracts, the 1937 Standard Annuity Mortality Table.

(d) For total and permanent disability benefits in or supplementary to ordinary policies or contracts, Class (3) Disability Table, 1926, which, for active lives, shall be combined with a mortality table permitted for calculating the reserves for life insurance policies.

(e) For accidental death benefits in or supplementary to policies, the Inter-Company Double Indemnity Mortality Table combined with a mortality table permitted for calculating the reserves for life insurance policies.

(f) For group life insurance, life insurance issued on a substandard basis and other special benefits, such tables as may be approved by the commissioner.

(3) The reserve according to the Commissioner's Reserve Valuation Method, for the life insurance and endowment benefits of a policy providing for a uniform amount of insurance and requiring the payment of uniform premiums is the excess, if any, of the present value, at the date of valuation, of such future guaranteed benefits provided for by such policy, over the then present value of any future modified net premiums therefor. The modified net premiums for any such policy shall be such uniform percentage of the respective contract premiums for such benefits that the present value, at the date of issue of the policy, of all such modified net premiums shall be equal to the sum of the then present value of such benefits provided for by the policy and the excess of paragraph (a) over paragraph (b):

(a) A net level annual premium equal to the present value, at the date of issue, of such benefits provided for after the first policy year, divided by the present value, at the date of issue, of an annuity of one per annum payable on the first and each subsequent anniversary of such policy on which a premium falls due; provided, however, that such net level annual premium shall not exceed the net level annual premium on the 19 year premium whole life plan for insurance of the same amount at an age one year higher than the age at issue of such policy.

(b) A net one year term premium for such benefits provided for in the first policy year.

(4) Reserves according to the Commissioner's Reserve Valuation Method shall be

calculated by a method consistent with the principles of subsection (3) for:

(a) Life insurance policies providing for a varying amount of insurance or requiring the payment of varying premiums.

(b) Annuity and pure endowment contracts.

(c) Disability and accidental death benefits in all policies and contracts.

(d) All other benefits, except life insurance and endowment benefits in life insurance policies.

(5) In no event shall a company's aggregate reserves for all life insurance policies, excluding disability and accidental death benefits, be less than the aggregate reserves calculated in accordance with the method set forth in subsection (3) and the mortality table or tables and rate or rates of interest used in calculating nonforfeiture benefits for such policies.

**739.040 Optional use of other standards.** (1) Reserves for any category of policies, contracts or benefits may be calculated, at the option of the company, according to any standards which produce greater aggregate reserves for such category than those calculated according to the minimum standards provided in ORS 739.030 or 739.035.

(2) In such case, with respect to the calculation of reserves of policies and contracts to which ORS 739.035 applies, the rate or rates of interest used shall not be higher than the corresponding rate or rates of interest used in calculating any nonforfeiture benefits provided for therein. However, reserves for participating life insurance policies may be calculated according to a rate of interest lower than the rate of interest used in calculating the nonforfeiture benefits in such policies. If such lower rate differs from the rate used in the calculation of the nonforfeiture benefits by more than one-half percent, the company issuing such policies shall file with the commissioner a plan providing for such equitable increases, if any, in the cash surrender values and nonforfeiture benefits in such policies as the commissioner approves.

**739.045 Additional liability when inadequate premium charged.** When the actual premium charged after May 21, 1917, for an insurance by any life insurance company is less than the net premium for such insurance computed according to the table of mortality and rate of interest prescribed

in ORS 739.025 to 739.040 the company shall be charged as a separate liability with the value of an annuity, the amount of which shall equal the difference between such net and actual premiums, and the term of which in years shall equal the number of future annual premiums due on such insurance at the date of valuation.

**739.050 to 739.100** [Reserved for expansion]

The entire amount of such accumulation, with interest, shall be held as a trust fund by the company subject to withdrawal, on terms stated in the contract, at any time on 30 days' notice.

(3) Such accumulation fund shall, for the purpose of the General Insurance Law, be considered as premium income subject to the same taxes and reported by the company as premiums paid in advance and be considered as a liability.

## **POLICY PROVISIONS AND BENEFITS**

**739.305 Filing of policy forms with commissioner.** No policy of life insurance or endowment or annuity contract shall be issued or delivered in this state until the form of the same has been filed with the commissioner.

No such policy or contract shall be issued if the commissioner gives written notice within 30 days of such filing to the company proposing to issue it showing wherein the form of such policy does not comply with the law.

**739.310 Policy must embody contract.**

No life insurance company shall make any insurance, guarantee, contract or pledge in this state, or to or with any resident or citizen thereof, which does not definitely state the amount of benefits payable, the manner of payment and the consideration therefor. No life insurance contract or policy may be issued which does not include all conditions and provisions relating to the contract.

**739.315 Prohibited provisions.** After January 1, 1918, no policy of life insurance other than industrial insurance, annuities and pure endowments with or without return of premiums shall be issued or delivered in this state or be issued by a domestic life insurance company if it contains any of the following provisions:

(1) A provision limiting the time within which any action at law or suit in equity may be commenced to less than three years after the cause of action or suit accrues.

(2) A provision by which the policy purports to be issued or to take effect more than six months before the original application for the insurance was made.

(3) A provision for forfeiture of the policy for failure to repay any loan on the policy or any interest on such loan while the total indebtedness on the policy is less than the loan value thereof.

**739.320 Required provisions.** (1) After January 1, 1918, no policy of life insurance, other than industrial insurance, annuities and pure endowments with or without return of premium, shall be issued or delivered in this state or be issued by a domestic life insurance company unless it contains in substance the following provisions:

(a) A provision that all premiums after the first shall be payable in advance, either at the home office of the company or to an agent of the company, upon delivery of a receipt signed by one or more of the officers who shall be designated in the policy.

(b) A provision that the insured is entitled to 30 days of grace within which the payment of any premium after the first year may be made, subject at the option of the company to an interest charge not in excess of five percent per annum for the number of

days of grace elapsing before the payment of the premium. During the period of grace the policy shall continue in full force. In case the policy becomes a claim during the period of grace before the overdue premium or the deferred premiums of the current policy year, if any, are paid, the amount of such premiums, with interest on any overdue premium, may be deducted from any amount payable under the policy in settlement.

(c) A provision that the policy shall constitute the entire contract between the parties and shall be incontestable after it has been in force for two years during the lifetime of the insured, except for nonpayment of premiums and for violations of the conditions of the policy relating to naval, military or aerial service in time of war. (d) A provision that all statements made by the insured shall, in the absence of fraud, be deemed representations and not warranties, and that no such statement shall be used in defense of a claim under the policy unless contained in a written application and unless a copy of such statement is indorsed upon or attached to the policy when issued.

(e) A provision that if it is found at any time before final settlement under a policy that the age of the insured has been misstated, the amount payable under the policy shall be such as the premium would have purchased at the correct age, or the premium may be adjusted and credit given to the insured or to the company, according to the company's published rate at date of issue.

(f) A provision that the policy shall participate in the surplus of the company annually. Any policy containing provision for participation at the end of the first policy year, and annually thereafter, may provide that each dividend shall be paid subject to the payment of the premium for the next ensuing year. The insured under any annual dividend policy shall have the right each year to have the dividend arising from such participation paid in cash, and if the policy provides other dividend options, it shall further provide which of said options is effective if the insured does not elect any such other option on or before the expiration of the period of grace allowed for the payment of the

premium. This provision shall not apply to any form of paid-up insurance or temporary insurance or pure endowment insurance, issued or granted in exchange for lapsed or surrendered policies, or to nonparticipating policies.

(g) A provision that after the policy has been in force three full years the company, at any time while the policy is in force, will advance, on proper assignment or pledge of the policy and on the sole security thereof at a specified rate of interest, a sum equal to or at the option of the insured less than the amount required by ORS 739.325 under the conditions specified thereby, and that the company will deduct from such loan value any existing indebtedness on the policy not otherwise deducted in determining such loan value and any unpaid balance of the premium for the current policy year, and may collect interest in advance on the loan to the end of the current policy year. This provision shall not be required in term insurance, nor shall it apply to temporary insurance or pure endowment insurance, issued or granted in exchange for lapsed or surrendered policies.

(h) A provision for nonforfeiture benefits and cash surrender values in accordance with the requirements of ORS 739.335 or 739.345.

(i) A provision specifying the options to which the policyholder is entitled in the event of default in a premium payment.

(j) A table showing in figures the loan values and the options available under the policy each year upon default in premium payments, during at least the first 20 years of the policy or during the premium paying period if less than 20 years.

(k) A provision that if in event of default in premium payments the value of the policy was applied to the purchase of other insurance as provided for in this section, and if such insurance is in force and the original policy has not been surrendered to the company and canceled, the policy may be reinstated within three years from such default, upon evidence of insurability satisfactory to the company and payment of arrears of premiums and the payment or reinstatement of any other indebtedness to the company upon said policy, with interest at the rate of not exceeding six percent per annum.

(L) A provision that when a policy becomes a claim by the death of the insured, settlement shall be made upon receipt of due

proof of death and of the interest of the claimant, and not later than two months after the receipt of such proof.

(m) A table showing the amounts of instalments, if any, in which a policy may provide its proceeds may be payable.

(n) Title on the face and on the back of the policy, briefly and correctly describing the same.

(2) Any of the foregoing provisions or portions thereof not applicable to single premium or nonparticipating or term policies shall to that extent not be incorporated therein. **739.325 Loan value.** (1) In the case of policies issued prior to the operative date defined in ORS 739.340, the loan value referred to in paragraph (g) of subsection (1) of ORS 739.320 is the reserve at the end of the current policy year on the policy and on any dividend additions thereto, less a sum not more than:

(a) Two and one-half percent of the amount insured by the policy and of any dividend additions thereto; or, at the option of the company,

(b) One-fifth of the entire reserve, the policy to specify the mortality table and rate of interest adopted for computing such reserve.

Such policies may further provide that such loan may be deferred for not exceeding three months after the application therefor is made.

(2) In the case of all other policies, the loan value is the cash surrender value at the end of the current policy year as required by ORS 739.350. The company shall reserve the right to defer such loan, except when made to pay premiums, for six months after application therefor is made.

**739.330 Interest on loans may be added to principal.** In ascertaining the indebtedness due upon policy or premium loans, the interest, if not paid when due, shall be added to the principal of such loans and shall bear interest at the rate specified in the note or loan agreement.

**739.335 Nonforfeiture benefits of policies issued prior to operative date of Standard Nonforfeiture Law.** (1) This section applies

only to policies of life insurance issued prior to the operative date defined in ORS 739.340. It has no application to term insurance of 20 years or less.

(2) The nonforfeiture benefit and cash surrender value referred to in paragraph (h) of subsection (1) of ORS 739.320 shall be available in event of default in premium payments after premiums have been paid for three years. It shall be a stipulated form of insurance the net value of which shall be at least equal to the reserve at the date of default on the policy and on dividend additions thereto, if any, the policy to specify the mortality table and rate of interest adopted for computing such reserve, less a specified percentage, not more than two and one-half, of the amount insured by the policy and of existing dividend additions thereto, if any, and less any existing indebtedness to the company on or secured by the policy.

(3) The policy may be surrendered to the company at its home office within one month of date of default for a specified cash value at least equal to the sum which would otherwise be available for the purchase of insurance as provided in subsection (2). The company may defer payment for not more than three months after the application therefor is made.

(4) In event of default in a premium payment before the options described in subsections (2) and (3) become available the reserve on any dividend additions then in force may, at the option of the company, be paid in cash or applied as a net premium to the purchase of paid-up term insurance for any amount not in excess of the face of the original policy. [Amended by 1953 c.92 §1]

**739.340 Standard Nonforfeiture Law; exceptions.** (1) ORS 739.340 to 739.370 are known as the Standard Nonforfeiture Law.

(2) The operative date of the Standard Nonforfeiture Law as to any policy or contract is the earlier of:

(a) January 1, 1948; or

(b) The date specified in a written notice, filed with the commissioner by any company, of election to comply with the Standard Nonforfeiture Law as to such policy as of the specified date.

(3) The Standard Nonforfeiture Law does not apply to:

(a) Any reinsurance, group insurance, pure endowment, annuity or reversionary annuity contract.

(b) Any term policy of uniform amount, or renewal thereof, of 15 years or less expiring before age 66, for which uniform premiums are payable during the entire term of the policy.

(c) Any term policy of decreasing amount on which each adjusted premium, calculated as specified in ORS 739.360, is less than the adjusted premium so calculated on a 15 year term policy issued at the same age and for the same initial amount of insurance.

(d) Any policy which is delivered outside this state through an agent or other representative of the company issuing the policy.

(e) Any policy issued before the operative date of the Standard Nonforfeiture Law as to such policy.

**739.345 Required provisions relating to nonforfeiture.** (1) No policy of life insurance shall be issued or delivered in this state unless it contains in substance the following provisions, or corresponding provisions which in the opinion of the commissioner are at least as favorable to the defaulting or surrendering policyholder:

(a) That in the event of default in any premium payment after premiums have been paid for at least one full year the company will grant, upon proper request not later than 60 days after the due date of the premium in default, a paid-up nonforfeiture benefit on a plan stipulated in the policy, effective as of such due date, of the value required by ORS 739.355.

(b) That upon surrender of the policy within 60 days after the due date of any premium payment in default after premiums have been paid for at least three full years in the case of ordinary insurance or five full years in the case of industrial insurance, the company will pay, in lieu of any paid-up nonforfeiture benefit, a cash surrender value of the amount required by subsection (1) of ORS 739.350.

(c) That a specified paid-up nonforfeiture benefit shall become effective as specified in the policy unless the person entitled to make such election elects another available option not later than 60 days after the due date of the premium in default.

(d) That, if the policy has become paid up by completion of all premium payments or if it is continued under any paid-up nonforfeiture benefit which became effective on or after the third policy anniversary in the

case of ordinary insurance or the fifth policy anniversary in the case of industrial insurance, the company will pay, upon surrender of the policy within 30 days after any policy anniversary, a cash surrender value of the amount required by subsection (2) of ORS 739.350.

(e) A statement of the mortality table and interest rate used in calculating the cash surrender values and the paid-up nonforfeiture benefits available under the policy, together with a table showing the cash surrender value, if any, and paid-up nonforfeiture benefit, if any, available under the policy on each policy anniversary either during the first 20 policy years or during the term of the policy, whichever is shorter. Such values and benefits shall be calculated upon the assumption that there are no dividends or paid-up additions credited to the policy and that there is no indebtedness to the company on the policy. At the option of the company such table may also show such values and benefits for any year or years beyond the twentieth policy year.

(f) A brief and general statement of the method to be used in calculating the cash surrender value and the paid-up nonforfeiture benefit available under the policy on any policy anniversary beyond the last anniversary for which such values and benefits are consecutively shown in the policy, with an explanation of the manner in which the cash surrender values and the paid-up nonforfeiture benefits are altered by the existence of any paid-up additions credited to the policy or any indebtedness to the company on the policy.

(2) Any of the foregoing provisions or portions thereof not applicable by reason of the plan of insurance may, to the extent inapplicable, be omitted from the policy.

(3) The company shall reserve the right to defer the payment of any cash surrender value for a period of six months after demand therefor with surrender of the policy.

**739.350 Determination of cash surrender values.** (1) Any cash surrender value available under the policy in the event of default in a premium payment due on any policy anniversary, whether or not required by ORS 739.345, shall be an amount not less than the excess, if any, of the present value, on such anniversary, of the future guaranteed benefits which would have been provided for by the policy, including any existing paid-up additions, if there had been no default, over

the sum of (a) the then present value of the adjusted premiums, as defined in ORS 739.360, corresponding to premiums which would have fallen due on and after such anniversary, and (b) the amount of any indebtedness to the company on the policy.

(2) Any cash surrender value available within 30 days after any policy anniversary under any policy paid up by completion of all premium payments or any policy continued under any paid-up nonforfeiture benefit, whether or not required by ORS 739.345, shall be an amount not less than the present value, on such anniversary, of the future guaranteed benefits provided for by the policy, including any existing paid-up additions, decreased by any indebtedness to the company on the policy.

**739.355 Determination of nonforfeiture benefits.** Any paid-up nonforfeiture benefit available under the policy in the event of default in a premium payment due on any policy anniversary shall be such that its present value as of such anniversary shall be at least equal to the cash surrender value then provided for by the policy or, if none is provided for, that cash surrender value which would have been required by paragraph (b) of subsection (1) of ORS 739.345 in the absence of the condition that premiums have been paid for at least a specified period.

**739.360 Adjusted premiums.** (1) The adjusted premiums for any policy shall be calculated on an annual basis and shall be such uniform percentage of the respective premiums specified in the policy for each policy year that the present value, at the date of issue of the policy, of all such adjusted premiums shall be equal to the sum of:

(a) The then present value of the future guaranteed benefits provided for by the policy.

(b) Two percent of the amount of insurance if the insurance is uniform in amount, or of the equivalent uniform amount as defined in subsection (2) of this section if the amount of insurance varies with duration of the policy.

(c) Forty percent of the adjusted premium for the first policy year.

(d) Twenty-five percent of either the adjusted premium for the first policy year or the adjusted premium for a whole life policy of the same uniform or equivalent uniform amount with uniform premiums for the whole

of life issued at the same age for the same amount of insurance, whichever is less. In applying the percentages specified in paragraphs (c) and (d), no adjusted premium shall be deemed to exceed four percent of the amount of insurance or level amount equivalent thereto.

(2) In the case of a policy providing an amount of insurance varying with duration of the policy, the equivalent level amount thereof for the purpose of this section shall be deemed to be the level amount of insurance provided by an otherwise similar policy, containing the same endowment benefit or benefits, if any, issued at the same age and for the same term, the amount of which does not vary with duration and the benefits under which have the same present value at the inception of the insurance as the benefits under the policy.

(3) Except as provided in paragraphs (a) and (b) of this subsection, all adjusted premiums and present values referred to in this section shall be calculated on the basis of the Commissioner's 1941 Standard Ordinary Mortality Table for ordinary insurance and the 1941 Standard Industrial Mortality Table for industrial insurance and the rate of interest, not exceeding three and one-half percent per annum, specified in the policy for calculating cash surrender values and paid-up nonforfeiture benefits.

(a) In calculating the present value of any paid-up term insurance with accompanying pure endowment, if any, offered as a nonforfeiture benefit, the rates of mortality assumed may be not more than 130 percent of the rates of mortality according to the applicable table.

(b) For insurance issued on a substandard basis, the calculation of any such adjusted premiums and present values may be based on such other table of mortality as may be specified by the company and approved by the commissioner.

**739.365 Supplemental rules for calculating nonforfeiture benefits.** (1) Any cash surrender value and any paid-up nonforfeiture benefit available under the policy in the event of default in a premium payment due at any time other than on the policy anniversary shall be calculated with allowance for the lapse of time and the payment of fractional premiums beyond the last preceding policy anniversary.

(2) All values referred to in ORS 739.350 to 739.360 may be calculated upon the as-

sumption that any death benefit is payable at the end of the policy year of death.

(3) The net value of any paid-up additions, other than paid-up term additions, shall be not less than the dividends used to provide such additions.

**739.370 Policy benefits and premiums that may be disregarded in calculating cash surrender values and nonforfeiture benefits.**

(1) Notwithstanding the provisions of ORS 739.350, additional benefits payable:

(a) In the event of death or dismemberment by accident or accidental means;

(b) In the event of total and permanent disability;

(c) As reversionary annuity or deferred reversionary annuity benefits;

(d) As decreasing term insurance benefits provided by a rider or supplemental policy provision to which, if issued as a separate policy, ORS 739.340 to 739.370 would not apply; or

(e) As other policy benefits additional to life insurance and endowment benefits; and premiums for all such additional benefits shall be disregarded in ascertaining cash surrender values and nonforfeiture benefits.

(2) No such additional benefits shall be required to be included in any paid-up nonforfeiture benefits.

Such a statement shall be signed by the president and secretary of the corporation and bear the corporate seal.
