633.015 Registration of commercial feed required; fee. (1) No person shall distribute a nonregistered commercial feed. Every brand,

and each formula or formulation thereof, of commercial feeds manufactured, compounded, delivered, distributed, sold, offered or exposed for sale in this state shall be registered with the department. Application for registration shall be submitted on forms furnished by the department, and, if the department so requests, shall be accompanied by the label or a facsimile of the label and other printed matter describing the product. Upon approval by the department, a certificate of registration shall be furnished to the applicant. All registrations expire on December 31 of each year. The application shall include the information required by paragraphs (b), (c), (d) and (e) of subsection (1) of ORS 633.025 and such other information as the department may require.

(3) Changes in the guarantee of either chemical or ingredient composition of a registered commercial feed may be permitted, if there is satisfactory evidence that such changes would not result in a lowering of the feeding value of the product for the purpose for which designed.

(4) The department may refuse registration of any commercial feed when the application is not in compliance with the provisions of ORS 633.006 to 633.089 and 633.992 and may cancel any registration subsequently found not to be in compliance with any provision of ORS 633.006 to 633.089 and 633.992, after the registrant has been given reasonable opportunity to be heard before the department and to amend his application in order to comply with the requirements of ORS 633.006 to 633.089 and 633.992.

(5) Customer-formula feeds are exempt from registration.

(6) Each application for registration shall be accompanied by a fee to be established by the department not to exceed \$20 for each formula or formulation of commercial feed under each brand.

(a) The net weight.

(b) The name or brand under which the commercial feed is sold.

(c) The guaranteed analysis of the commercial feed, listing the minimum percentage of crude protein and crude fat, and the maximum percentage of crude fiber. For mineral feeds the list shall include the following specifications as to minerals present, expressed as herein indicated: Minimum and maximum percentages of calcium (Ca), minimum percentage of phosphorus (P), minimum percentage of iodine (I), and minimum and maximum percentages of salt (NaCl). Other substances or elements, determinable by laboratory methods, may be guaranteed by permission of the department. When other substances or elements are guaranteed, they shall be subject to inspection and analysis in accordance with methods and regulations prescribed by the department. Products sold solely as mineral or vitamin supplements, or both, need not show guarantees for protein, fat or fiber.

(d) The common or usual name of each ingredient used in the manufacture of the commercial feed, except as the department may, by regulation, permit the use of a collective term for a group of ingredients all of which perform the same function or, by regulation, permit the use of a statement of alternative ingredients of comparable feeding value. In lieu of the common or usual name of each ingredient used, or a collective term for a group of ingredients, or a statement of alternative ingredients, a statement may be made that the ingredients used in the manufacture of the commercial feed are in accordance with the registration with the department, and such list of ingredients shall be made available to the purchaser upon request to the manufacturer or the department.

(e) The name and principal business address of the person responsible for distributing the commercial feed.

(2) When a commercial feed is distributed in this state in bags or other containers, the label shall be placed on or affixed to the container; when a commercial feed is distributed in bulk the label shall accompany delivery and be furnished to the purchaser at time of delivery.

(3) If a commercial feed contains a drug, the department shall require the label to show the purpose, amount present, directions for use, and any necessary warning against misuse of the feed. In registering any commercial feed containing substances referred

to in this subsection, the department shall adopt, in so far as practicable, and shall be in conformity with the rules, regulations and restrictions established by the Federal Government relating to such substances.

(c) Date of sale.

(d) The product name and brand name, if any, and the number of pounds or other recognized units of measurement of each registered commercial feed used in the mixing or mixture and the name and number of pounds of each other feed ingredient added.

(2) If a custom mixed feed contains a nonnutritive substance which is intended for use in the diagnosis, cure, mitigation, treatment, or prevention of disease or which is intended to affect the structure of any function of the animal body, the department may require the label and the invoice to show:

(a) The amount of the substance present.

(b) The directions for use and warnings against misuse of the feed.

(3) The invoice or information prescribed in this section shall be furnished by the seller to the user or purchaser at the time the custom mixed feed is delivered. The records of the seller from which the invoice and information is derived shall be maintained by the seller for a period of at least two years. Application for license shall be on forms prescribed by the department and shall be accompanied by a license fee to be established by the department not to exceed \$50. All licenses shall expire December 31 of each year.

(2) (a) A person who is a contract feeder or who manufactures, mixes or processes feed solely for his own animals is not subject to the provisions of subsection (1) of this section, provided no drugs in any form are utilized in the manufacturing, mixing or processing of such feed. In the event drugs are so utilized, the contract feeder or person using the same shall be subject to the provisions of subsection (1) of this section.

(b) In accordance with the applicable provisions of ORS 183.310 to 183.500, the department shall promulgate rules designating the types or categories of persons described in paragraph (a) of this subsection to whom this section applies. In promulgating such rules, the department shall consider:

(1) If any poisonous, deleterious or non-nutritive ingredient is therein present in sufficient amount to render it injurious to health when fed in accordance with directions for use shown on the label.

(2) If any valuable constituent has been in whole or in part omitted or abstracted therefrom or any less valuable substance substituted therefor.

(3) If its composition or quality falls below or differs from that which by its labeling it is purported or represented to possess.

(4) If it contains added hulls, screenings, refuse screenings, straw, cobs or other high fiber material, unless the name of each material is stated on the label.

(5) If it contains pesticide residues or other chemicals in excess of amounts which, by regulation, the department declares safe for feeding purposes. In adopting such regulations the department may take into consideration the commonly permitted amounts of chemicals authorized by:

(a) The United States and other states.

(b) Other recognized agencies or organizations experienced in the chemical field.

(6) If it contains a drug other than those permitted by regulations promulgated by the department. In adopting such regulations the department may take into consideration the commonly accepted definitions approved or authorized by:

(a) The United States and other states.

(b) Other recognized agencies or organizations experienced in such matters, such as the Association of American Feed Control Officials.

(5) If any word, statement, or other information required by ORS 633.006 to 633.089 and 633.992 or by regulation of the department to appear on the label is not prominently placed thereon with such conspicuousness, as compared with other words, statements, designs, or devices in the labeling, and in such terms as to render it likely to be read and understood by the ordinary individual under customary conditions of purchase and use. [1961 c.314 §6]

(4) When inspection and analysis of an official sample indicate that a commercial feed has been adulterated or misbranded, the results of analysis shall be forwarded by the department to the registrant. Upon request, within 30 days, the department shall furnish to the registrant a portion of the sample analyzed.

(1) The department shall establish and maintain a procedure, plan and system whereby a farmer, contract feeder or other person actually feeding bulk commercial feed or custom mixed feed to animals may request the department to sample and provide special official testing and analysis of such feeds. It is the purpose and intent of this section that the department desires to make its personnel, facilities and laboratories available to such persons and to determine if such feeds are in compliance with the provisions of ORS 633.006 to 633.089 and 633.992 or for any other purpose which the department may determine is reasonable and necessary.

(2) The department may provide for the obtaining, handling and testing of samples of bulk commercial feed and custom mixed feed as provided in subsection (1) of this section, including split sampling thereof with portions of each sample being made available to the seller and to the contract feeder or person feeding the feed to animals. Copies of the final results of the tests or analysis, which shall not be a public record, shall be made available only to the seller and to the contract feeder or person feeding the feed to animals. A label shall be placed on each, stating the brand and grade of the commercial fertilizer, agricultural minerals or lime sampled, the name of the party from whose stock the sample was drawn and the name and place of the drawing. The label shall be signed by the officer, employe or deputy taking the sample. One of the duplicate samples shall be delivered to the person whose stock was sampled, or to the person in possession of such stock and the other retained by the officer, employe or deputy of the department making the inspection.

However, the registration of each grade shall be considered as being in the nature of a distinct and separate license and the refusal to register, or cancellation of the registration of any grade registered or offered for registration by any person, shall not affect the registration of any other grade by the same person.

(c) Draw or cause to be drawn a representative sample of any lot of such seed for official testing and analysis or, in the case of individually packaged seeds, select a number of such packages as a representative sample.

(2) Any sample so drawn may represent any lot, or portion of such lot, of such seed which shall be divided, at the request of the owner or person in charge, into two approximately duplicate samples, each of which shall be properly identified, labeled and sealed in accordance with the rules and regulations adopted under ORS 633.680. However, in any case where the service involved is in such location or under such circumstances that the usual fees or charges are insufficient to cover the expense, he may make additional charges to avoid loss to this state.

[Amended by 1955 c.379 §17; 1969 c.132 §6]

633.690 Quarantine of seed entering state; disposition of nonconforming seed.

If the licensee continues to violate those sections, the department may suspend his license in the same manner as provided by law for the suspension of licenses by the State Department of Agriculture. The licensee shall have the same right to a hearing and appeal to the courts as provided by law in such cases.

(2) After hearing, the department may reinstate the license if the violation is clearly accidental, reinstate the license for a probationary period of not more than six months or revoke it permanently. A summary of all pertinent facts and findings in such cases

shall be published in the official publication of the State Department of Agriculture.

633.720 Sampling and testing on request of owner of seed. On application of any person owning or controlling any lot of seed, the director may draw an official sample of any lot of such seed for official testing purposes. After dividing the sample into two approximately equal portions and properly identifying, labeling and sealing them, he shall tender one portion to the applicant and shall send the other portion directly to the agricultural experiment station for testing. The experiment station shall report the results of such tests to the person for whom such sample was drawn, and he shall pay for such sampling at rates established by the director, in accordance with ORS 633.680, and for the seed testing at commercial rates as established by the dean in accordance with ORS 633.600.
