This action is necessary to safeguard the health and welfare and property of the people of Oregon. These safeguards are in the fields of geology as related to engineering, ground water, land use planning, mineral exploration and development, geologic hazards, the further development of the science of geology, and other geologic matters of concern to the people of the state. [1977 c.612 §1]

672.520 [Repealed by 1971 c.751 §39]

(Certificates)

672.525 When geologist to be certified. (1) No person, other than a registered geologist, a registered certified specialty geologist or a subordinate under the direction of either, shall provide or prepare for the public practice of geology any geologic maps, plans, reports, or documents except as specifically exempted in ORS 672.535.

(2) No person shall publicly practice, or offer to publicly practice geology in this state, or to use in connection with his name or otherwise assume or advertise any title or description tending to convey the impression that he is a registered geologist, unless such person has been registered or exempted under the provisions of ORS 672.505 to 672.705. The right to engage in the public practice of geology is deemed a personal right, based on the qualifications of the individual as evidenced by his certificate of registration, and shall not be transferable.

(3) One year after July 21, 1977, no person other than a geologist registered under ORS 672.505 to 672.705 shall stamp or seal any plans, plats, reports, or other documents with the seal or stamp of a registered geologist or registered certified specialty geologist, or to use in any manner the title "registered geologist" or the title of any registered certified specialty geologist unless registered or certified under ORS 672.505 to 672.705.

(1) Persons engaged in teaching and conducting research in the science of geology in an accredited college or university, and students acting under their direction, but who are not engaged in the public practice of geology in this state;

(2) Officers and employes of the United States of America, practicing solely as such officers or employes; or

(3) A subordinate to a geologist registered under ORS 672.505 to 672.705 in so far as he acts solely in such capacity. This exemption, however, does not permit any such subordinate to practice geology for others in his own right or use the title "registered geologist." [1977 c 612 §4]

672.540 [Repealed by 1971 c.751 §39]

672.545 Practice of geology by proprietorship, partnership or corporation; employment of nonregistered geologist; practice by other professionals; practice by nonresident. (1) ORS 672.505 to 672.705 do not prohibit one or more geologists from practicing through the medium of a sole proprietorship, partnership, or corporation. In a partnership or corporation whose primary activity consists of geological services, at least one partner or officer shall be a registered geologist.

(2) ORS 672.505 to 672.705 do not prevent or prohibit an individual, firm, company, association, or corporation whose principal business is other than the public practice of geology from employing a nonregistered geologist to perform nonpublic geological services necessary to the conduct of their business.

(3) ORS 672.505 to 672.705 shall not be construed to prevent or to affect:

(a) The practice of any licensed profession or trade by limiting its appropriate and current custom or practice including the practice of any profession or trade for which a license or registration is required under any other law of this state including the practice of registered civil and mining engineers lawfully practicing civil and mining engineering in its various specialized branches; or

(b) The practice of geology by a person not a resident of and having no established place of business in this state, when the practice is limited to a specific project and does not exceed one period of 60 consecutive days in any calendar year, and provided the person is licensed or registered to practice such profession in another state where the requirements for certification, registration or licensing are not lower than those specified in ORS 672.505 to 672.705 and provided further that such nonresident shall file with the board, on or before entering the state for commencing such work, a statement giving his name, residence, the number of his license or certificate of registration, and by what authority issued, and upon the completion of the work, a statement of the time engaged in such work

within the state. [1977 c.612 §5]

672.555 Application; qualifications for certification. (1) An application for registration as a geologist or certification in a specialty shall show the applicant's education and a detailed summary of the applicant's geologic work.

(2) To be eligible for a certificate of registration, an applicant shall meet each of the following minimum qualifications:

(a) Have graduated from an accredited college or university with either a major in geology, engineering geology or geological engineering, or related geological sciences; or have completed 45 quarter hours or the equivalent in geological science courses leading to a major in geology, of which at least 36 hours or the equivalent were taken in the third or fourth year, or in graduate courses. The board shall waive academic requirements for a person already practicing geology on July 21, 1977, provided application for registration is made not later than one year after appointment of the board, and the applicant can provide evidence to satisfy the board that the applicant is competent to practice public geology.

(b) Have at least seven years of geological work which shall include a minimum of three years of geological work under the supervision of a registered geologist or a minimum of five accumulative years' experience in responsible charge of geological work. However, prior to the date one year after the appointment of the board, professional geological work shall qualify under this subsection if it is under the supervision of a qualified geologist. The following criteria of education and experience qualify toward accumulation of the required seven years of professional geological work:

(A) Each year of undergraduate study in the geological sciences shall count as one year of training up to a maximum of two years, and each year of graduate study shall count as a year of training up to a maximum of three years.

(B) Total credit for undergraduate and graduate study shall in no event exceed a total of four years toward meeting the requirement for at least seven years of geological work.

(C) The board may consider in lieu of geological work required, the cumulative total of geological work or geological research of persons teaching at the college or university level, provided such work or research is equivalent to the professional requirements specified in this subsection.

(D) The ability of the applicant shall have been demonstrated by having performed the work in a responsible position as determined by the board. The adequacy of the required supervision and experience shall be determined by the board in accordance with standards set forth in rules adopted by it.

(c) Successfully pass such examinations, established by the board, designed to demonstrate that the applicant has the necessary knowledge and skill to exercise the responsibilities of the public practice of geology. The board shall waive the examination requirement for registration as a geologist or certification in a specialty of an applicant who makes a written application to the board not later than one year after appointment of the board and who otherwise meets the qualifications of this subsection.

(3) A certificate of registration as a geologist may be granted to a person who is certified as a "geologist in training" and who has fulfilled the requirements as described in paragraphs (a) and (c) of subsection (2) of this section. [1977 c.612 §§6, 7; 1981 c.295 §2]

672.560 [Repealed by 1971 c.751 §39]

672.565 Certification in specialty. (1) In addition to registering as a geologist, qualified persons also may be eligible for certification in a specialty. Such specialties may be created by the board by rule, with the rules to contain any required additional qualifications. Only a registered geologist is eligible for certification in a specialty. Application may be submitted for both registration as a geologist and for certification in a specialty at the same time, but the applicant must be approved for registration as a geologist before being considered for certification in a specialty.

(2) An applicant for certification in a specialty shall meet all of the requirements of a registered geologist and such special requirements as the board may establish by regulation, normally including a written examination and, in addition, the applicant's seven years of geological work shall include one of the following:

(a) A minimum of three years performed under the supervision of a geologist registered and certified in the specialty for which the applicant is seeking certification with the exception on timing noted in ORS 672.555 (2)(b); or

(b) A minimum of five years' experience in responsible charge of geological work in the specialty for which the applicant is seeking certification.

(3) The board shall establish professional affairs committees, as needed, to represent each

of the specialties into which the board determines certification of registration may be divided. Each committee shall establish qualifications, which shall include a written examination, for certification in its specialty, and shall establish a definition of that specialty, subject to approval of the board; and shall advise the board on professional affairs in which the committee is concerned. Membership of each committee shall be made up exclusively of geologists certified or qualified in the particular specialty involved.

(4) Engineering geology shall be one of the specialties requiring certification.

(5) Certification as a geologist in training shall require graduation from an accredited college or university with a major in geology or geological sciences as prescribed under ORS 672.555 (2)(a) and the passing of a written, or written and oral examination on geological subjects. [1977 c.612 §8; 1981 c.295 §3]

672.570 [Repealed by 1971 c.751 §39]

672.575 Examination. The board shall determine the scope, form and content of the examinations, provided for under ORS 672.505 to 672.705. [1977 c.612 §9]

672.580 [Repealed by 1971 c.751 §39]

672.585 Certificate of registration; renewal; fee; replacement. (1) The board shall issue a certificate of registration, upon payment of the registration fee, to any applicant who, in the opinion of the board, has satisfactorily met all the requirements of ORS 672.505 to 672.705. The issuance of a certificate of registration by the board shall be prima facie evidence that the person named therein is entitled to all the rights and privileges of a registered geologist, or certified specialty geologist, while the certificate remains unrevoked or unexpired.

(2) All certificates shall be renewed annually at such time as will be designated by the board. All applications for renewal shall be filed with the administrator before the expiration date, accompanied by the annual renewal fee. A license which has expired for failure to renew may only be restored after application and payment of the prescribed restoration fee.

(3) Reduced annual renewal fees for registrants reaching the age of 70 may be established at not less than \$10 by action of the board.

(4) A new certificate of registration to replace any certificate lost, destroyed, or mutilated, may be issued subject to the rules of the board and payment of the fee. [1977 c.612 §11]

672.590 [Repealed by 1971 c.734 §21 and 1971 c.751 §39]

672.595 Registration without examination. A person who holds a certificate of registration to engage in the practice of geology, or a certificate of specialization, issued to him by a proper authority of a state, territory, or possession of the United States or the District of Columbia having licensing requirements comparable to Oregon, and who, in the opinion of the board otherwise meets the requirements of ORS 672.505 to 672.705 may, upon application, be registered without further examination. [1977 c.612 §10]

672.600 [Repealed by 1971 c.751 §39]

672.605 Seal of geologist. Each registrant hereunder, upon issuance of a certificate, shall obtain a seal of the design authorized by the board, bearing the registrant's name and the legend "registered professional geologist" or "certified specialty geologist." All drawings, reports, or other geologic papers or documents, involving geologic work as defined in ORS 672.505 to 672.705 which shall have been prepared or approved by a registered geologist or a subordinate employe under his direction for the use of or for delivery to any person or for public record within this state shall be signed by him and impressed with the seal or the seal of a non-resident practicing under the provisions of ORS 672.505 to 672.705, either of which shall indicate his responsibility for them. [1977 c.612 §12]

672.610 [Repealed by 1971 c.751 §39]
