344.055 Policy on vocational education and employment training. It shall be the policy on vocational education and employment training in this state that:

(1) Accessibility to vocational education programs should be facilitated. Individuals should have a choice of training opportunities for which they are qualified and from which they can benefit. Such opportunities should be available from local school systems, community colleges, federal and state manpower training programs, private vocational technical schools, apprenticeship programs and institutions of higher education. The student should have easy access to training with the flexibility to move in and out of programs as needs indicate. Opportunities should be available for all individuals to obtain the skills and knowledge needed for initial employment as well as for occupational upgrading and job changes.

(2) State and local planning and program operations should be coordinated to provide the most efficient use of federal, state, local and private resources.

(3) A comprehensive system of education and employment training should be developed. Secondary schools should provide an educational program which balances the educational skills of reading, writing, speaking, computation and reasoning ability, occupational skills including technical knowledge, manipulative ability and other skills required to perform job tasks and employment skills such as job seeking, work attitude, work adjustment and job-coping abilities. Community colleges should provide comprehensive programs in both academic and vocational-technical subjects. In addition, community colleges should provide short-term training designed for specific occupations, related training for apprenticeships and opportunities for employed persons to improve their skills. Other providers of employment training should compliment this effort with programs aimed at specific job training.

(4) Full working partnerships among education, business, industry, labor, government and agriculture should be developed to meet employer needs for a skilled work force and to promote employee job satisfaction. Such partnerships should be fostered by promoting efforts such as work site training stations, lending or donating of equipment to training programs, employee-teacher exchange programs, advisory committees and

cooperative work experience programs. All segments of the community should be encouraged to assist in occupational training.

(5) Federal, state, local and private funding resources should be combined to insure the development and implementation of quality programs. Both the governmental and private sectors should make a commitment to occupational training as an investment which will help bring about economic development and stability as well as high social and financial returns. Improvement of existing training programs, as opposed to development of duplicative or parallel efforts, should be utilized to promote flexibility and economy in the design and delivery of occupational education.

(6) High quality occupational training requires an adequate supply of well prepared teachers and support personnel. Provisions should be made for the formal preparation of teachers and for the recruitment of teachers from business and industry. Programs should be designed and implemented to insure that teachers remain current in their areas of expertise, and instructors should be encouraged to return to business and industry to gain additional experience in their fields. To promote retention of qualified personnel, institutions preparing and certifying teachers and agencies employing teachers should allow credit for relevant occupational experiences.

(7) Vocational education programs and other employment training programs should be developed, operated and evaluated jointly with representatives of the occupational instructional areas included in the programs. Evaluation of efforts should consider the cost effectiveness of the program both for society and the state.

(8) Each student's educational, occupational and employment skills should be assessed upon entering so that proper placement in the educational program can occur. Credit should be given for prior education, work experience and community service. Assessments to determine progress, competency attainment and needed corrective action should be made on a periodic basis. Assistance in obtaining employment and follow-through services to help students succeed on the job should be provided.

(9) Provisions should be made to meet the needs of women, minorities, disadvantaged or handicapped persons and others who have special training needs. Special curricula, facilities, equipment, counseling and instruction should be provided as necessary. The agencies and institutions serving these groups should coordinate use of the available resources to provide cost effective services. [1981 c.756 §1]

344.060 [Amended by 1959 c.641 §35; repealed by 1965 c.100 §456]

344.070 Revolving accounts for federally sponsored education or training; advances; uses. (1) The Executive Department may draw warrants upon any state fund to which federal funds for training or education have been credited, in payment of vouchers approved by the Superintendent of Public Instruction or the Commissioner for Community College Services pursuant to rules of the State Board of Education, in favor of school districts and community college districts, for such sums, not exceeding \$100,000 for a single district in the aggregate, as the state board, by duly adopted resolution, shall determine. The warrants, upon delivery thereof to the school districts, shall constitute advances from state funds to enable the districts more readily to effectuate the purposes set forth in any federal law or regulation pertaining to vocational education or training of war workers, or other education or training sponsored by the Federal Government.

(2) The districts to which moneys are advanced shall be responsible for the full repayment to the state of all sums advanced. The advances are not within any limitation upon indebtedness prescribed by law for school districts. The moneys advanced to school districts and community college districts shall not exceed in the aggregate the moneys to the credit of the state fund from which they are paid, and shall constitute advances to the recipient school district in anticipation of verified vouchers to be supplied therefor. The advances are to be used as revolving funds for the payment of the costs of vocational training programs. The advances shall be made only in those cases in which the Federal Government defrays all or part of the cost of such programs. [Amended by 1965 c.100 §435; 1965 c.102 §1; 1983 c.740 §109; 1989 c.491 §48]

344.080 Reimbursement vouchers; accounts and records; bond. (1) All reimbursement vouchers for claims paid from the revolving funds mentioned in ORS 344.070 shall be approved by the Superintendent of Public Instruction or the Commissioner for Community College Services pursuant to rules of the State Board of Education. When vouchers are so approved, warrants covering the same shall be drawn by the Executive Department, payable from the appropriate fund, and be used to reimburse the revolving funds.

(2) The school districts receiving such advances shall maintain their accounts and records so as to disclose at all times the true status of the unpaid vouchers issued for the reimbursement of the funds, the school district warrants drawn against the funds ad-

vanced and the balances to the credit thereof.

(3) The revolving funds and accounts shall be subject to examination and audit by the state in the manner provided by law for other state funds and accounts. The State Board of Education may require an audit of the revolving accounts and shall take proper precautions as to the safety of, and accountability for, all funds advanced.

(4) The State Board of Education may require the filing with it of a bond of a corporate surety duly licensed to transact business in this state to insure the proper handling of and responsibility for any funds advanced. The bond shall be cumulative and supplemental to fidelity insurance coverage already held by the school district concerned. The state may have recourse to any and all fidelity bonds of clerks or other financial officers of the district to protect such advances. [Amended by 1983 c.740 §110; 1989 c.491 §49]

344.090 Procedure when training programs are no longer needed, or when advances are improperly handled or accounted for. When it appears to the Superintendent of Public Instruction or the Commissioner for Community College Services that the training and educational programs for which funds are advanced under ORS 344.070 have been completed, or that the need for such advances or revolving funds no longer exists, or that the sums advanced are not being properly handled or accounted for, the superintendent may require that all or part of the amounts advanced to any school district shall be returned, with any interest earned, to the state funds or accounts from which the amounts originally were withdrawn. Upon receipt of notification from the superintendent that funds advanced are to be returned, the school district concerned shall immediately repay the same to the State Treasurer, for credit to the proper fund or account. To the extent that funds advanced are so repaid, security or protection theretofore required by the State Board of Education under ORS 344.080 (4) to insure the safety of such funds may be released. [Amended by 1989 c.491 §50]

344.100 Acceptance of provisions of federal vocational education Act. The State of Oregon hereby accepts all provisions and benefits of an Act of Congress entitled "An act to provide for the promotion of vocational education; to provide for cooperation with the states in the promotion of such education in agriculture and the trades and industries; to provide for cooperation with the states in the preparation of teachers of vocational subjects; and to appropriate money and regulate its expenditure."

344.110 State Treasurer designated custodian of federal appropriation; authority to disburse federal and state appropriations. The State Treasurer is designated and appointed custodian of all moneys received by the state from the appropriation made by the Act of Congress accepted by ORS 344.100. The State Treasurer is authorized to receive and provide for the proper custody of the moneys and to make disbursements thereof in the manner provided in that Act and for the purposes therein specified. The State Treasurer shall also pay out of any moneys appropriated for vocational education purposes by the State of Oregon upon the order of the Superintendent of Public Instruction pursuant to rules of the State Board of Education. [Amended by 1989 c.491 §51]

344.120 Payment of claims approved by board. All lawfully incurred claims duly approved pursuant to rules of the State Board of Education, including all claims to be paid from the moneys received by the state from the Federal Government for vocational education purposes and for which the State Treasurer is made custodian shall be paid as provided in ORS 293.295 to 293.462. The Executive Department shall draw warrants on the State Treasurer in payment thereof out of the proper appropriations or funds. [Amended by 1983 c.740 §111; 1989 c.491 §52]

344.130 Cooperation by district school boards to establish vocational training. Any district school board may cooperate with the State Board of Education in establishment of vocational schools or classes giving instruction in agricultural subjects, the trade or industrial subjects, or in home economics subjects, and may use any moneys raised by public taxation in the same manner as moneys for other school purposes are used for the maintenance and support of public schools.

344.215 "Career education" defined. (1) Career education is defined as that education which links learning activities with jobs along the entire range of skills from sub-technical to the professional career and is an integral part of the total educational program. Career education provides the learning experiences needed to make effective career

choices and to develop the attitudes, knowledges and skills that enable persons to perform successfully in the producer (occupational) role and to assist them in other related life roles. It progresses through the steps of awareness and exploration of work, preparation for a broad range of occupations and specialization in a specific occupation.

(2) Vocational education is defined as a component of career education which offers specific skill training in a wide variety of subtechnical, technical and subprofessional skills to prepare individuals for gainful employment. It is completed initially at the high school level or in a post-high school technical institution, community college or apprenticeship program and may continue through skill upgrading or retraining for a new job. (4) Prepare and submit to the U. S. Commissioner of Education and to the National Advisory Council on Vocational Education,

through the State Board of Education, an annual evaluation report, accompanied by such additional comments of the state board as the state board deems appropriate, which:

(a) Evaluates the effectiveness of career and vocational education programs, services and activities carried out in the five-year and annual program plans and accountability reports; and

(b) Recommends such changes in such programs, services and activities as may be warranted by the evaluations and deemed necessary;

(5)(a) Identify, after consultation with the State Manpower Services Council, the vocational education and employment and training needs of the state and assess the extent to which vocational education, employment training, and vocational rehabilitation represent a consistent, integrated and coordinated approach to meeting such needs; and

The state advisory council shall designate an appropriate state agency or other public agency, eligible to receive funds and to act as its fiscal agent for purpose of disbursement, accounting and auditing.
