**366.285 Location of highways when in doubt; procedure.** (1) The department may locate, relocate, define, establish, reestablish and confirm the extension, location and establishment of primary and secondary state highways where:

(a) By reason of loss or destruction of field notes of the original surveys made by the county when such roads or highways were laid out and established by the county, defective or incomplete surveys or records, or destroyed monuments or marks, the exact original location and boundary cannot be found or ascertained.

(b) For any reason the exact location and right of way lines are in doubt or are challenged.

(2) In exercising the authority under subsection (1) of this section the procedure afforded the county with respect to public roads under ORS 368.201 to 368.221 may be followed by the department. [Amended by 1981 c.153 §61]

**366.290 Adding to or removing roads from state highway system; responsibility for construction and maintenance.** (1) The department may select, locate, establish, designate, improve and maintain out of the highway fund a system of state highways, and for that purpose may, by mutual agreement with several counties, select county roads or public roads. By an appropriate order entered in its records the department may designate and adopt such roads as state highways. Thereafter the construction, improvement, maintenance and repair of such roads shall be under the jurisdiction of the department.

(2) In the selection of highways or roads to comprise the state highway system the department shall give consideration to and shall select such county roads or public roads as will contribute to and best promote the completion of an adequate system of state highways.

(3) With the written consent of the county in which a particular highway or part thereof is located, the department may, when in its opinion the interests of the state will be best served, eliminate from the state highway system any road or highway or part thereof. Thereafter the road or highway or part thereof eliminated shall become a county road or highway, and the construction, repair, maintenance or improvement, and jurisdiction over such highway shall be exclusively under the county in which such highway or road is located.

(4) The construction, maintenance and repair of state highways shall be carried on at the sole expense of the state or at the expense of the state and the county by mutual agreement between the department and the county in which any particular state highway is located. [Amended by 1953 c.252 §2; 1979 c.223 §1]

**366.295 Relocation of highways.** The Oregon Transportation Commission may make such changes in the location of highways designated and adopted by the commission, as in the judgment and discretion of the commission will result in better alignment, more advantageous and economical highway operation and maintenance, or as will contribute to and afford a more serviceable system of state highways than is possible under the present location. [Amended by 1977 c.312 §1]

**366.300 Treatment of sections eliminated when highway relocated.** (1) When-

ever the department relocates or realigns a state highway or a section thereof, and by reason of such relocation or realignment there is eliminated from the original route of the highway a section thereof, the eliminated section shall, if needed for the service of persons living thereon or for a community served thereby, be maintained by the department at state expense, or by the county or by the state and the county on such terms and conditions as may be agreed upon.

(2) If such eliminated sections of old right of way, or any part thereof, in the judgment of the department, are needed or valuable for public road use, then the department shall, by appropriate action, declare the purpose of the department to preserve the same for public road use.

(3) If the department determines under subsection (2) of this section that the eliminated sections are merely parts of the old right of way which are no longer needed or valuable for highway right of way purposes or any other public road use, then if such eliminated sections are not owned by the department in fee, the department shall abandon such eliminated sections and such sections shall, except as otherwise provided in this section, revert to and title thereto shall vest in the abutting owner or owners.

(4) Nothing in this section shall impair vested rights of property owners under existing deeds, easements or contracts whereby the state or any county acquired such rights of way. This section shall not prevent the department from contracting for the acquisition of easements or rights of way on such terms and conditions as to abandonment and reverter as it may consider advisable under the conditions then existing. [Amended by 1985 c.259 §1]

**366.305 Materials, supplies and equipment.** The department may select the materials to be used in the construction, maintenance and operation of state highways. It may purchase or contract for, independent of any particular job, improvement or highway project, whether done by contract, force account or otherwise, any material, supplies or equipment deemed necessary for carrying out the provisions and purposes of this Act in such amounts and manner and pursuant to such method as in the judgment of the department will be for the best interests of the state.

**366.310 Buildings and structures.** The department may construct, equip, furnish and maintain office accommodations, shops, equipment sheds, storage plants and warehouses, snow fences, patrolmen quarters or accommodations and any other building, structure or thing deemed necessary for the efficient administration of the duties of the

department and which in the opinion of the department are required for the proper and adequate accomplishment of the purposes of this Act.

**366.315 Widths of rights of way.** The department may determine the widths of rights of way for all state highways.

**366.317 Removal of trees and shrubs; notice; application.** When the construction, expansion or improvement of a state highway as defined in ORS 366.005 would otherwise clearly and certainly cause the destruction of trees and shrubs which in the judgment of the engineer or the designee of the engineer may be removed in safety, the Highway Division shall:

(1) Prior to their destruction, cause notice to be placed in a newspaper of general distribution in the locality in which these trees and shrubs are located that these trees and shrubs may be destroyed, and that application may be made to the division at a specific time and place to remove these trees and shrubs for transplanting; and

(2) Permit the removal of these trees and shrubs by those making application to do so. [1975 c.414 §1]

**366.320 Acquisition of rights of way and right of access.** (1) The department may acquire rights of way deemed necessary for all primary and secondary state highways, both within and without the corporate limits of cities and towns, except that such rights of way within the corporate limits of cities and towns may be acquired at the sole expense of the state, at the expense of the city or town or at the expense of the city or town and the state, as may be mutually agreed upon.

(2) The department may acquire by purchase, agreement, donation or by the exercise of the power of eminent domain, real property or any right or interest therein deemed necessary for rights of way, either for original location or for widening, straightening or otherwise changing any highway, road or street. The department may, when acquiring real property for right of way, acquire all right of access from abutting property to the highway to be constructed, relocated or widened.

(3) All rights of way owned or held by the several counties over and along any roads adopted as state highways are vested in the state, by and through the department. This subsection does not apply to any rights of way owned by any city for city streets. [Amended by 1953 c.252 §2]

**366.321 Expense of relocating municipal facilities payable by department; exceptions.** (1) When location, construction, relocation, reconstruction, maintenance or

repair of a state highway requires relocation of any facilities placed or maintained in or on a public right of way by any municipal corporation, or a district or authority established under ORS chapter 264, 450, 451, 523 or 545, the department shall pay the municipal corporation, district or authority whose facilities are so required to be relocated the reasonable expenses of relocation, less any benefits and salvage of the relocation.

(2) Subsection (1) of this section shall not apply to:

(a) Facilities located in or on the right of way of a state highway under permits issued by the department upon the condition that the permittee would bear the cost of any relocation; or

(b) Facilities located in or on the right of way of a state highway where the municipal corporation, district or authority established under ORS chapter 264, 450, 451 or 545, has placed such facilities in or on the right of way of the state highway without a permit from the commission or has refused to execute a permit as required by law or commission regulations. However, this paragraph shall not apply where such municipal corporation, district or authority has located facilities in or on the right of way of a city street or county road with the permission of the governing body of such city or county before such city street or county road was selected and designated a state highway by the Department of Transportation pursuant to ORS 366.290 or 373.010. [1967 c.272 §1; 1975 c.587 §1; 1975 c.782 §51a]

**366.323 Studies to aid in relocating persons displaced by highway acquisition.** When plans of the Department of Transportation projected for one year involve acquisition of properties in any city which will require removal of 25 or more dwelling units, businesses or institutions, the Department of Transportation shall make a study of the persons residing on or maintaining businesses or institutions on property scheduled for highway acquisition. Such studies shall be kept current until the premises required for highway acquisition are vacated. The department shall obtain such other information as it finds appropriate to aid in the relocation of persons displaced by the highway acquisition, and may extend its studies beyond city boundaries when the highway acquisition will involve dwellings, businesses or institutions within three miles of a city boundary. Such information shall be made available to the persons displaced and to other persons who may provide or assist in providing new locations. This section shall apply whether the highway acquisitions will be paid for in whole or in part from state funds either directly or by reimbursement.

The Department of Transportation may contract with any governmental subdivision or agency, or with private concerns to make and maintain such studies, or may employ necessary assistants therefor. [1959 c.648 §1; 1963 c.187 §1]

**366.324 Financial assistance to persons displaced by highway acquisition.** (1) When federal funds are available for payment of direct financial assistance to persons displaced by highway acquisition, the Department of Transportation may match such federal funds to the extent provided by federal law and to provide such direct financial assistance in the instances and on the conditions set forth by federal law and regulations.

(2) When federal funds are not available or used for payment of direct financial assistance to persons displaced by department acquisition of property, the department may provide direct financial assistance to such persons. Financial assistance authorized by this subsection shall not exceed the total amount that would have been payable under subsection (1) of this section if federal funds had been available or used. The department may adopt rules and regulations to carry out the provisions of this subsection. [1959 c.648 §2; 1963 c.187 §2; 1965 c.222 §1]

**366.325 Rights of way through cemeteries.** The department may acquire by purchase, agreement, donation or by exercise of the power of eminent domain, real property for right of way through a cemetery, except that the department has no authority to acquire any such real property by exercise of the power of eminent domain if within the area sought to be taken there are graves which would be disturbed by the location and construction of a highway. The department may acquire by purchase, agreement, donation or exercise of the power of eminent domain, real property contiguous to the cemetery, and may convey such real property to the cemetery association or the owners of the cemetery in exchange for the property sought to be acquired for right of way purposes, but such authority shall not be exercised unless and until the owners of the cemetery agree in writing to the exchange of lands.

**366.330 Acquisition of land adjoining right of way.** The department may, when acquiring real property for right of way purposes, acquire additional real property adjoining the real property sought to be acquired for the particular public project if such additional and adjoining real property is needed for the purpose of moving and establishing thereon buildings or other structures then established on real property required for right of way purposes. The ac-

quisition of the abutting, additional real property may be accomplished by purchase, agreement, donation or exercise of the power of eminent domain. Such real property can be acquired only in the event that the owner of the real property required for right of way purposes and on which there is then located buildings or other structures, has entered into a written agreement with the department providing for and consenting to the removal and reestablishment of the buildings or structures on the additional, abutting real property.

**366.332 Definitions for ORS 366.332 and 366.333.** As used in ORS 366.332 and 366.333:

(1) "Real property" includes any right, title or interest in real property.

(2) "Utility" means any corporation, including municipal or quasi-municipal corporation, company, individual, association of individuals, lessee, trustee or receiver, that owns, operates, manages or controls all or part of any plant or equipment in this state, whether or not such plant or equipment or part thereof is wholly within or outside any city, which plant or equipment is used, directly or indirectly:

(a) For the conveyance of telegraph or telephone messages, with or without wires;

(b) For the transportation of water, gas or petroleum products by pipelines;

(c) For the production, transmission, delivery or furnishing of heat, light, water, power, electricity or electrical impulses; or

(d) For the transmission and delivery of television pictures and sound by cables. [1965 c.382 §2]

**366.333 Acquisition of utility real property; exchange of land for right of way.** (1) If real property upon which utility facilities are located is necessary for city street, public road or state highway location, relocation, construction, reconstruction, betterment or maintenance, and any portion of the real property is likewise required by the utility for the proper operation of its business, but the utility is willing to convey the real property to the state for city street, public road or state highway purposes in exchange for other real property within a reasonable distance, the state, through the department, may acquire by purchase, agreement or by the exercise of the power of eminent domain, other real property, except that of another utility, within a reasonable distance. After having acquired such real property, the state, through the department, may convey it to the utility in exchange for the real property required from the utility for city street, public road or state highway

purposes. The difference in the value of the respective real properties shall be considered by the department in making the exchange.

(2) ORS 366.332 and this section do not vest in any utility any right, title or interest in any city street, public road, state highway or other public property. [1965 c.382 §§3, 4]

**366.335 Acquisition of railroad right of way; exchange of land therefor.** (1) Whenever in the location, relocation, construction or betterment of any highway within the state, it is deemed necessary to locate, relocate or construct the highway, or any part thereof, upon the right of way of any railroad company, the state, through the department may negotiate and agree with the railroad company for the right to use or occupy the right of way, or so much thereof as is necessary for highway purposes.

(2) In case no satisfactory agreement can be effected, then the state, through the department, may acquire the right of way by exercise of the power of eminent domain, and for that purpose may commence and prosecute condemnation proceedings to acquire the right to the use and occupancy of sufficient of the railroad right of way for highway purposes.

(3) Nothing in subsection (2) of this section authorizes the use or occupancy of the railroad right of way which would interfere with the operation of the railroad or its necessary appurtenances, taking into consideration the use of the railroad right of way by the company for yards, terminals, station grounds and necessary additional trackage, or which would jeopardize the safety of the public.

(4) In the event that the right of way or property of any railroad company in the state required or needed for state highway location, relocation, construction or betterment, and any portion of the property or right of way is likewise needed and required by the railroad company for the proper operation of its trains and the usual and ordinary conduct of its business, but which property or land the railroad company is willing to deed to the state for highway purposes in exchange for a like amount of land within a reasonable distance, the state, through the department, may acquire by purchase, agreement or by exercise of the power of eminent domain, an equal amount of land or property within a reasonable distance. After having acquired such land or property, the state, through the department, may convey the same to the railroad company in exchange for the land or property needed and required from the railroad company for highway purposes. The difference in the value of the respective parcels of land

shall be considered by the department in making the exchange. [Amended by 1965 c.383 §1]

**366.337 Exchange of certain parcels of land authorized.** The Department of Transportation, in the name of the State of Oregon, hereby is authorized to convey to any person, firm or corporation all or parts of the real properties described in section 1 of chapter 21, Oregon Laws 1953, in exchange for other real properties in close proximity thereto which, in the judgment of the department, are of equal or superior useful value for public use. [1953 c.21 §2]

**366.340 Acquisition of real property generally.** The department may acquire by purchase, agreement, donation or by exercise of the power of eminent domain real property, or any right or interest therein, including any easement or right of access, deemed necessary for:

(1) Construction of shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stock pile sites, weighing stations and broadcasting stations.

(2) Appropriation, acquisition or manufacture of road-building materials, approach or hauling roads, connecting roads, frontage road, highway drainage and drainage tunnels.

(3) Maintenance of an unobstructed view of any state highway so as to provide for the safety of the traveling public.

(4) Any other use or purpose deemed necessary for carrying out the purposes of this Act.

(5) Elimination or prevention of hazardous or undesirable points of entry from adjacent property to state highways. [Amended by 1953 c.252 §2]

**366.507 Modernization program; funding; conditions and criteria.** The Department of Transportation shall use an amount equal to the moneys in the State Highway Fund that become available for its use from the increase in tax rates created by the amendments to ORS 319.020, 319.530, 767.820 and 767.825 by sections 1, 2 and 10 to 15, chapter 209, Oregon Laws 1985, and an amount equal to one-third of the moneys in the State Highway Fund that become available for its use from any increase in tax rates created by the amendments to ORS 319.020, 319.530, 767.820 and 767.825 by sections 5, 6 and 8 to 15, chapter 899, Oregon Laws 1987, and from any increase in tax rates that results from the provisions of sections 16 and 17, chapter 899, Oregon Laws 1987, exclusively to establish a state modernization program for highways. The program established under this section and the use of moneys in the program are subject to the following:

(1) The moneys may be used by the department to retire bonds that the department issues for the modernization program under bonding authority of the department.

(2) The intent of the modernization program is to accelerate improvements from the backlog of needs on the state highways and to fund modernization of highways and local roads to support economic development in Oregon. Projects both on and off the state highway system are eligible.

(3) Projects to be implemented by the modernization program shall be selected by the Oregon Transportation Commission. The criteria for selection of projects will be established after public hearings that allow citizens an opportunity to review the criteria.

(4) In developing criteria for selection of projects, the commission shall consider the following:

**366.508 Legislative findings.** (1) The Legislative Assembly finds that:

(a) Estimated highway, road and street revenues from current sources will not adequately meet the need for continued development of a statewide road and bridge system that is economically efficient, provides accessibility to and from commercial, agricultural, industrial, tourist and recreational facilities and enhances the highway safety, environmental quality and land use goals of this state;

(b) Responsibility for the cost of the highway, road and street system should be proportional and should be based on the number and types of vehicles that use the system and on the frequency of their use; and

(c) Expansion, modernization, maintenance, repair, reconstruction, increased capacity and enhanced safety on all roads and bridges is crucial to the economic revitalization of Oregon.

(2) The Legislative Assembly declares that the purpose of this section and ORS 319.020, 319.530, 366.507, 366.524, 366.542, 366.790, 767.820 and 767.825 is:

(a) To enhance the revenue base for the state, counties and cities for continued development and maintenance of the road and bridge system; and

(b) To enhance the revitalization of this state's economy by implementing a long-term plan for the state, counties and cities that establishes priorities for road and bridge improvements. [1987 c.899 §1]

*Note:* 366.508 was enacted into law by the Legislative Assembly but was not added to or made a part of ORS chapter 366 or any series therein by legislative action. See Preface to Oregon Revised Statutes for further explanation.

**366.510 Turning over highway funds to State Treasurer.** All state officials charged with the collection of highway funds shall, upon the first of each month after collection, unless a different time is otherwise provided, turn the same over to the State Treasurer, who shall enter such revenues in the account of the highway fund. Footpaths and bicycle trails, including curb cuts or ramps as part of the project, shall be provided wherever a highway, road or street is being constructed, reconstructed or relocated. Funds received from the State Highway Fund may also be expended to maintain footpaths and trails and to provide footpaths and trails along other highways, roads and streets and in parks and recreation areas.

(2) Footpaths and trails are not required to be established under subsection (1) of this section:

(a) Where the establishment of such and paths. would be contrary to public safety;

(b) If the cost of establishing such paths and trails would be excessively disproportionate to the need or probable use; or

(c) Where sparsity of population, other available ways or other factors indicate an absence of any need for such paths and trails.

(3) The amount expended by the department or by a city or county as required or permitted by this section shall never in any one fiscal year be less than one percent of the total amount of the funds received from the highway fund. However:

(a) This subsection does not apply to a city in any year in which the one percent equals \$250 or less, or to a county in any year in which the one percent equals \$1,500 or less.

(b) A city or county in lieu of expending the funds each year may credit the funds to a financial reserve or special fund in accordance with ORS 280.100, to be held for not more than 10 years, and to be expended for the purposes required or permitted by this section.

(c) For purposes of computing amounts expended during a fiscal year under this subsection, the department, a city or county may record the money as expended:

(A) On the date actual construction of the facility is commenced if the facility is constructed by the city, county or department itself; or

(B) On the date a contract for the construction of the facilities is entered with a

private contractor or with any other governmental body.

(4) For the purposes of this chapter, the establishment of paths, trails and curb cuts or ramps and the expenditure of funds as authorized by this section are for highway, road and street purposes. The division shall recommend construction standards for footpaths and bicycle trails. Curb cuts or ramps shall comply with the requirements of ORS 447.310. The division shall, in the manner prescribed for marking highways under ORS 810.200, provide a uniform system of signing footpaths and bicycle trails which shall apply to paths and trails under the jurisdiction of the department and cities and counties. The department and cities and counties may restrict the use of footpaths and bicycle trails under their respective jurisdictions to pedestrians and nonmotorized vehicles, except that motorized wheelchairs shall be allowed to use footpaths and bicycle trails.

(5) As used in this section, "bicycle trail" means a publicly owned and maintained lane or way designated and signed for use as a bicycle route. [1971 c.376 §2; 1979 c.825 §1; 1983 c.19 §1; 1983 c.338 §919; 1991 c.417 §7]

**366.516 Incurring obligations payable from anticipated revenues.** The Department of Transportation may incur obligations to be paid from the State Highway Fund for the construction, reconstruction, improvement, repair or maintenance of highways, streets and bridges in excess of the amount then standing to the credit of the State Highway Fund if in the opinion of the department there will be sufficient funds available for the payment of such obligations when they become due and payable and all other debts, obligations and expenses chargeable against the State Highway Fund including those amounts that are required by law to be set aside from the State Highway Fund for particular purposes. Obligations incurred under the authority of this section need not be payable in the same biennial period during which the obligation is incurred. [1953 c.125 §2]

**366.517 Department may determine certain accounting procedures.** The Department of Transportation shall determine the accounting period for which any expenditures shall be charged against the State Highway Fund. The department may charge such expenditures against the State Highway Fund at the time the expenditures are actually paid even though the expenditures were

**366.518 Expenditures from highway fund to be reported, budgeted and limited to amounts budgeted.** The Department of Transportation shall submit a biennial statement and budget estimate as required by law, and shall limit its expenditures from the State Highway Fund during each biennial period to the total amount of the budget approved according to law; provided, that the word "expenditures" shall mean all money actually paid out or due and payable, but shall not mean liabilities or obligations incurred but not due and payable until a subsequent biennial period. The provisions of any law establishing a Legislative Assembly emergency committee shall apply to expenditures from the State Highway Fund. [1953 c.125 §4]

**366.520 Expenses in legalizing state highways.** The expenses incurred in any proceeding by the department under ORS 368.201 to 368.221, when applied to state highways, shall be paid out of the highway fund. [Amended by 1981 c.153 §62]

Any unexpended and unobligated balance remaining in any such appropriation heretofore or hereafter made shall, after the expiration of the biennium for which the appropriation was made, be returned to the State Highway Fund and may thereafter be used for any purpose authorized by law. [1953 c.84 §1]

(2) "Federal and state dedicated resources" means all county road fund resources that are dedicated by federal or state law for county road purposes, as determined by the Department of Transportation, including but not limited to amounts allocated to each county annually under the federal-aid highway program authorized under chapter 1, Title 23, United States Code, but excluding the highway bridge replacement and forest highway programs, and including federal and state grants-in-aid or portions of grants-in-aid specifically earmarked for county roads or bridges.
